

**P.U.(A) 328/86**  
**FACTORIES AND MACHINERY (BUILDING OPERATIONS AND WORKS OF ENGINEERING**  
**CONSTRUCTION) (SAFETY) REGULATIONS 1986**  
**PART II - GENERAL PROVISIONS**

---

**Regulation 10. Access to workplace.**

(1) Stairways, ramps or runways shall be provided as the means of access to working levels above or below ground except where nature of progress of the work prevents their installation in which case ladders or other safe means shall be provided.

(2) All buildings under construction of more than two storeys high shall be provided with well-defined access at the ground floor with adequate overhead protective cover for persons entering or leaving the building.
