**FACTORIES AND MACHINERY (BUILDING OPERATIONS AND WORKS OF ENGINEERING**  
**CONSTRUCTION) (SAFETY) REGULATIONS 1986**  
**PART XI - DEMOLITION**

---

**Regulation 107. Demolition of structural steel.**

All steel structures shall be demolished column length by column length and tier by tier. Every structural member which is being dismembered shall not be under any stress other than its own weight and such member shall be chained or lashed in place to prevent any uncontrolled swinging or dropping. Large structural members shall not be thrown or dropped from the building, but shall be carefully lowered. where a derrick is used in the demolition of buildings of skeleton steel construction, the floor on which the derrick rests shall be completely planked over and the floor shall be of adequate strength for such operation.
